There are many colorful containers in OCU's hallway.

Recently, the containers are very popular in Taiwan. Many people will go to a place where have distinguished containers. Then, people will take a pictures and post on the Instagram or Facebook to share with others. Also, have container fair for vendors to set up a stall. People can go there to eating foods, drinking beer, and taking pictures. Today, this containers trend brings into the university campus. Overseas Chinese University is the only one that have containers on campus at Taichung. The containers are colorful at the hallway.

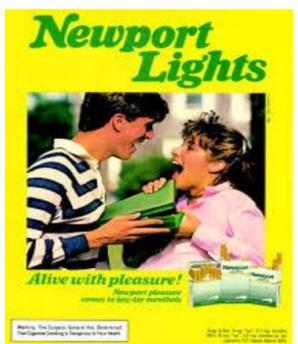

This amazing container is created by Department of Multimedia and Game Design. There are eleven different colors and just look like a beautiful rainbow. The container's color is very bright, so students who pass by will catch their attention. Many students will go there to take some pictures, so students not only can study at school but also can take a stunning picture.

Students said: They very like the corner of containers at school, and they will go there to take graduation photo. The containers have become our school's feature. In addition, many container lovers will come to OCU to look around and take some beautiful pictures. It's became a small scenic spot for people to visit.

54TH SCHOOL ANNIVERSARY

Happy birthday to OCU. Overseas Chinese University has been 54-year-old. The school anniversary was held in October 20. Most of the students, faculty and staff had to take part in the celebration. The director general of ministry of education also came and joined the anniversary celebration ceremony. She told that enrollment rate is higher than last year. There were a variety of activities, such as relay race, tug of wars, and fun games. In addition, everyone was looking forward to the cheerleading competition.

Teachers and administrative staffs are walking to playground

The alumnus would be also invited to join a party, they would provide delicacy for the alumni association. Furthermore, student's association would invite artists and singers to hold a concert. It was an essential part of school anniversary. The tickets were usually sold out in few days.

Every department had to spend a lot of time preparing for the competition. Students need to make the performance props and wonderful acting in order to fight for the champion.

Therefore, if you yearn to participate in the annual concert, you need to sign up for it as soon as possible. Last, there would be an exhibition from October 15 to November 23. It was held by three students and named "confess". If you wanted to visit the exhibition, please take your time

Students used drones to wipe out the bad insects at Shengang's orchards

Then OCU used two drones that can spread pesticide to kill the litchi stink bugs. The pesticide was made up of organic plant soaps, so this way will not damage the litchi trees and cause air pollution. When the drones spread about ten minutes, and the bugs died quickly on the ground. OCU devoted to promote using drones and training it. Drones not only can fly on the sky to take pictures for wide range, but also can detect and spread pesticide to kill the bad insects.

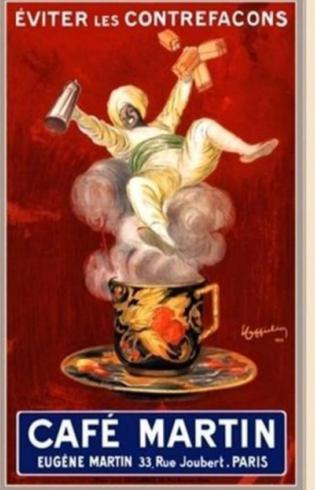

OCU Vice President said: Our school have been honored with eighteen million dollars from Ministry of Education's subsidy and have 73 drones. The drones can save 40-60 times of manpower and 100 times of time. It was a high demand facility in the markets. Also, OCU chairman said: He was very happy that Department of Multimedia and Game Design can used their new equipment to help the famers to solve their problems. OCU hope they can fulfillment of social responsibility in the future.

OCU BRING DRONES TO THE ORCHARD AT SHENGANG.

There are a lot of litchi trees at Shengang, and the litchi trees have attracted by many litchi stink bugs. Litchi stink bugs are bad insect for the trees, and it can breed faster. Fruit farmers was very headache about this problem.

The drones spray organic pesticide on litchi trees

OCU HELD THE INTERNSHIP EXHIBITION IN EVERY YEAR

OCU holds the fair of internship every year. It can help students to adapt the new workforce after graduation. There are as many as hundreds of companies provide students opportunities to practical training. Students have more chance to realize about every works characteristic, and they also can know if they are suitable for this job in the future.

Some universities will ask students to find their own internship, but OCU holds an exposition for juniors to select their jobs every year.

Every student makes effort and spends a lot of time making resume, autobiography, and cover letter. Students will demonstrate their qualities because they want to identify themselves with directors and interviewers. They also must wear formal suits for the interview.

There are several companies to cooperation with OCU about industry-academia

OCU chairman points out that our school will continue to promote cooperation with companies. Some companies will require their employees to have skills and competencies. Therefore, OCU will set up professional curriculum and ask students to obtain certification and license. Moreover, school will promote second language and encourage students to take an English proficiency test, such as TOEIC and TOFEL. Based on previous experience, most of the students will remain in office after the end of the internship.
